33	 Depending on the number of drops of essential oil* used, this diffuser (500 ml) is suitable for rooms of up to 100 m2. As soon as you switch on the diffuser, it silently produces a fragrant white, dry and cold mist. The water doesn't need to warm up, as it is immediately diffused by means of ultrasonic waves. This offers a whole range of benefits. Because no hot water or candles are required, it's safer for children and pets. The quality of the essential oil is also better preserved when it isn't heated up. Because no burning takes place in the house, the air also remains clean. The subtle mist that comes from the diffuser greets visitors in an original way. Thanks to the warm white light of the LED bulbs, you can also have an energy-saving atmospheric light in your home! *sold without essential oil	Aroma Room diffuser	€89
